TDS THE DENTAL
SPECIALISTS

ORTHODONTICS

Your dentist has referred you to The Dental Specialists Orthodontics to determine if you or your child would benefit from orthodontic treatment. At your initial evaluation our orthodontists and their team will provide you with a thorough examination and explain your treatment options, the estimated time involved and the approximate cost. The appointment will take about 45 minutes and is always complimentary at The Dental Specialists Orthodontics.

Our orthodontists have the specialized knowledge to identify and plan the right individualized treatment for your unique smile. After graduating from dental school, orthodontists continue their education for two or more years focusing solely on orthodontics. The Dental Specialists Orthodontics is committed to the personalized and professional care you deserve.

Orthodontic treatment can enhance the appearance of your smile, improve your bite, create room for erupting teeth, and simplify oral hygiene - giving you a beautiful, healthy smile for your future.

Today, patients of all ages are seeing the benefits of the latest advances in orthodontics. The American Association of Orthodontists recommends evaluation of children by age 7 to prevent developing problems and begin treatment at the right time for your child.

Adolescents and adults appreciate our treatments that minimize discomfort and shorten treatment time. Currently one of every five patients in orthodontic treatment is over 21. With state-of-the-art technology, including low-profile metal braces, clear "invisible" braces, and transparent aligner technology, The Dental Specialists Orthodontics has a treatment that is right for you.

We look forward to meeting you and helping you achieve the smile you've always wanted. Call today to schedule your complimentary evaluation.
